

August 3rd, 2009

Greetings from Atlas Copco Mafi-Trench Company LLC:

For nearly 35 years Mafi-Trench Company has been pleased to provide quality turboexpander systems to our customers around the world. The past five years have shown tremendous growth in our market share, product selection, and company size. This success is due in part to the acquisition of Mafi-Trench by Atlas Copco in 2007.

The integration of Mafi-Trench into the successful Atlas Copco business model is near completion and the next step is to adopt the Atlas Copco brand. We are pleased to announce that effective August 3, 2009 we have changed our name to Atlas Copco Mafi-Trench Company LLC. We are now known as “Atlas Copco” and will be using the Atlas Copco logo.

What does this mean to our Customers?

Since we are a part of the Gas and Process Division headquartered in Cologne, Germany, we will incorporate our current website www.mafi-trench.com into www.atlascopco-gap.com.

In addition, our customers will from now on be supported by the 27 Atlas Copco service centers and professional customer centers worldwide.

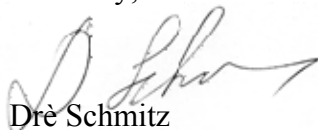

Over the past two years Atlas Copco has invested an additional USD 2,400,000 in our facility to increase production and modernize our processes.

The improvements are nearing completion and have resulted in 25 % more production capacity and shorter delivery times. I am sure you would agree these improvements are welcome in these challenging times.

We look forward to continue to be your preferred supplier of hydrocarbon turboexpander solutions. We are proud to share the Atlas Copco Group’s vision to remain First in Mind — First in Choice® to our customers.

With this letter you will find our most current listing of sales and service contacts worldwide.

Sincerely,

Drè Schmitz
President, Atlas Copco Gas and Process Division

Atlas Copco Gas and Process is a division within Atlas Copco’s Compressor Technique business area. The company develops and manufactures turbo compressors and expansion turbines for the gas and process industry and also offers the matching range of aftermarket products. Atlas Copco Gas and Process solutions are used primarily by the oil and gas, chemical/petrochemical process and power industries, and in the air separation sector. With divisional headquarters located in Cologne, Germany, the company operates a global network of production, sales and service locations. Learn more at www.atlascopco-gap.com.
